

SPECIALISTS IN INTERACTIVE TECHNOLOGY FOR EXHIBITS

Signal-Innova specializes in interactive technology for museums, exhibits, zoos, aquariums and other public access venues.

Based in Southern California, the company was founded in 1984 to provide technology solutions to the toy industry. For the past 10 years, Signal-Innova has focused on developing custom interactive technology solutions for museum exhibits with a heavy emphasis on reliability, flexibility, affordability and customer satisfaction.

As our clients' needs are unique, Signal-Innova works closely with exhibit designers/builders to determine the appropriate solution for each situation. Recommendations may include our own proprietary technology, third party equipment and/or a combination.

With our proprietary "Exhibits Alive!" product line, we employ a modular approach, using building block components customized to suit the unique requirements of each exhibit.

This modular approach translates into reliability by assembling field-tested components in new combinations. Our components are designed, engineered, assembled and tested in our California facility, which also handles repairs and modifications.

OUR CLIENTS We are proud of our successful collaboration with public and private organizations as well as exhibit design/build firms. Organizations for which we have provided our interactive technology – either directly or as subcontractors of design/build firms – are spread across the United States.

They include:

MUSEUMS - The Smithsonian National Air and Space Museum (DC), Bishop Museum (HI), Los Angeles Maritime Museum (CA), Schwenkfelder Library & Heritage Center (PA), Yakima Valley Museum (WA), Astor House Museum (CO), Milwaukee Public Museum (WI), Wisconsin Veterans Museum (WI), Museum of Man (CA), Catalina Island Museum (CA).
